300+

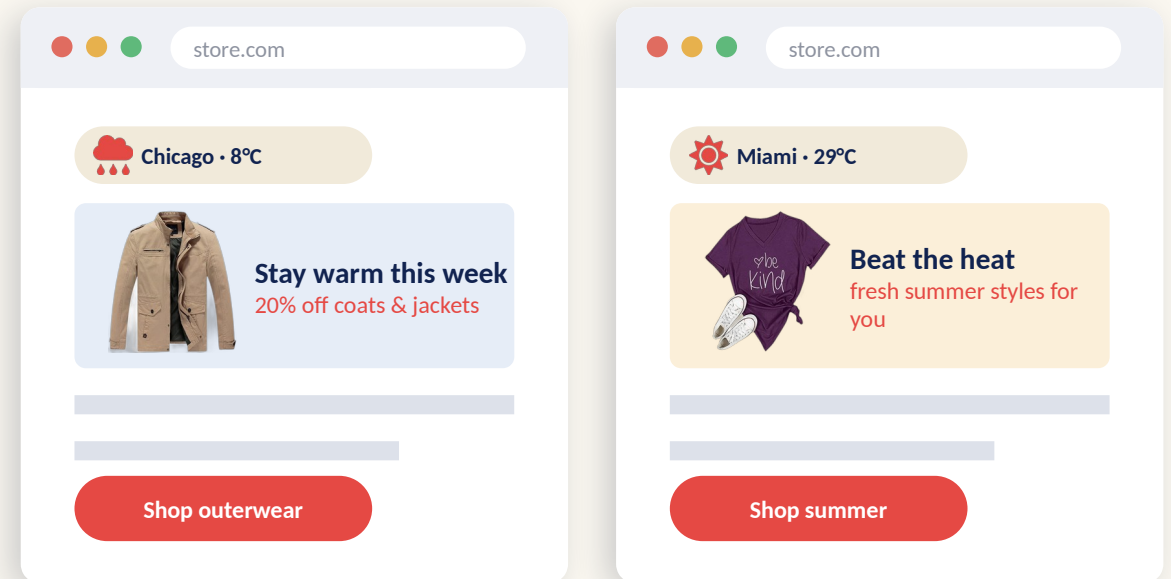

AI algorithms

Show every shopper a store made for them.

Every visitor arrives with different intent — and your store can meet each one with the right product, offer, and urgency in real time. More relevance means more revenue per visit.

- ✓ Recommend what each shopper buys next
- ✓ Trigger offers by behavior, geo & weather
- ✓ Personalize email beyond first-name tokens
- ✓ Win back carts with timely nudges

ONE STORE • TAILORED IN REAL TIME

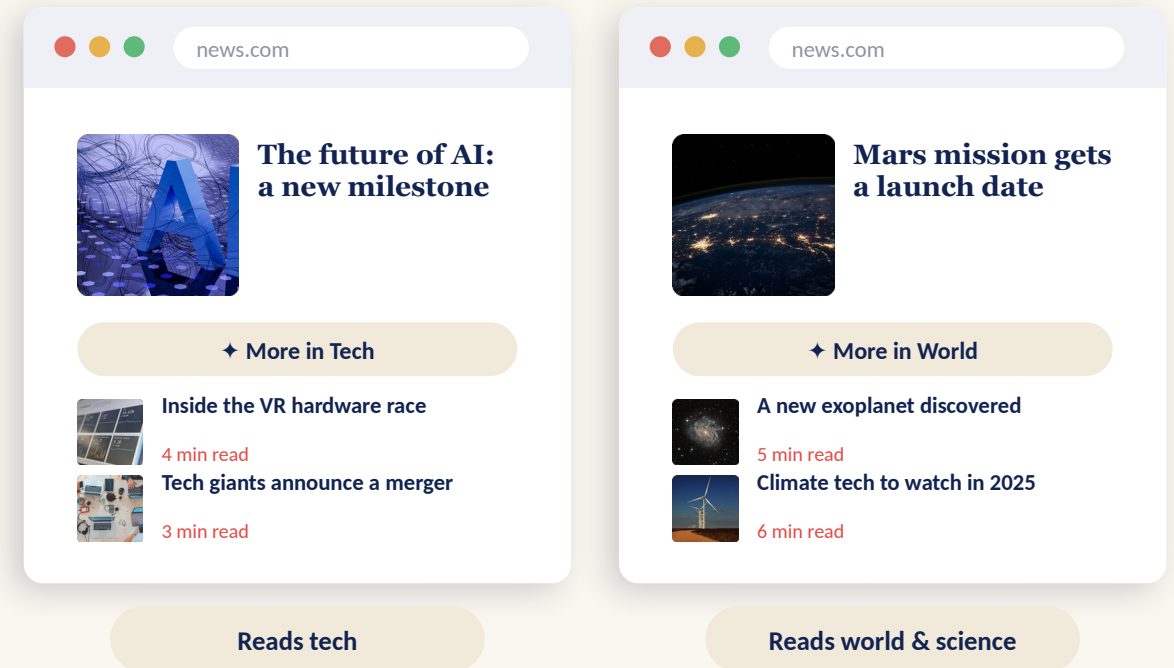

No login needed — by weather, location, device & behavior.

Keep every reader on the page.

Surface the next article, video, or resource each reader actually wants — matched to interests, reading history, and on-page behavior. More pages per session, more return visits, more revenue.

- ✓ Recommend the next article or video
- ✓ Match content to each reader's interests
- ✓ Re-engage readers with personalized email
- ✓ Grow subscriptions with targeted prompts

ONE SITE • TAILORED TO EACH READER

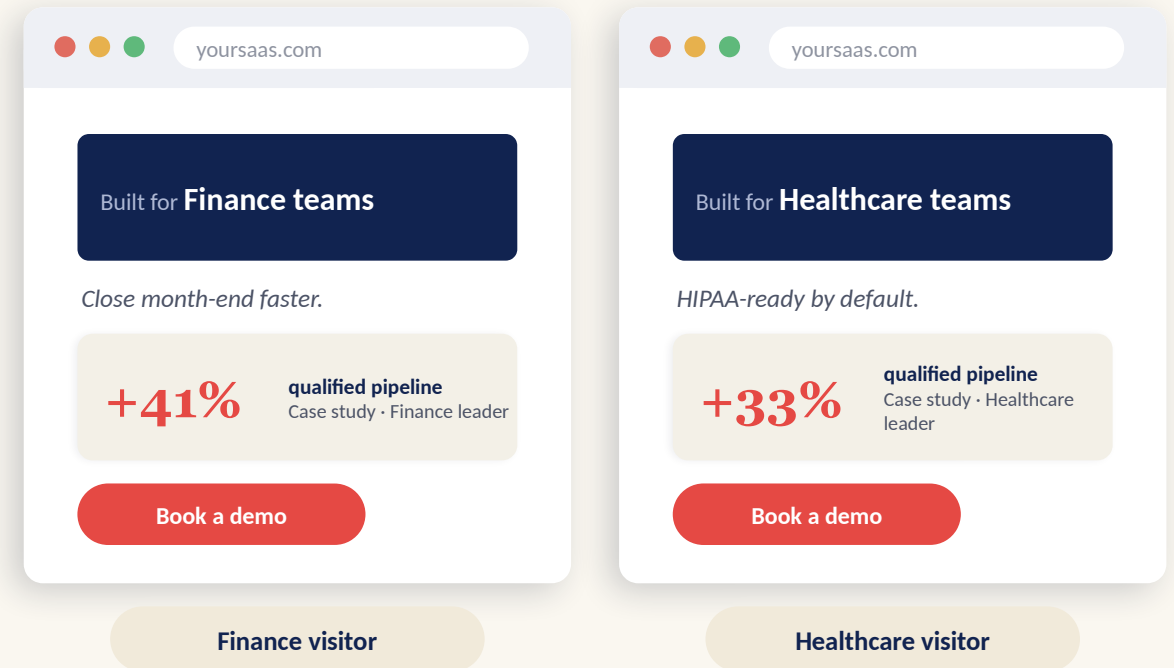

Every reader sees the stories most likely to keep them reading.

Greet every account by name.

Detect the company behind the visit by reverse-IP or CRM match, then tailor your homepage messaging, social proof, and CTAs to their industry — turning anonymous traffic into pipeline.

- ✓ Detect target accounts by reverse-IP
- ✓ Tailor messaging by industry & segment
- ✓ Show the logos & proof that resonate
- ✓ Route hot accounts to sales instantly

ONE HOMEPAGE • TAILORED BY ACCOUNT

Detected by reverse-IP or CRM — every account sees messaging for its industry.

WHY IT MATTERS

Relevance is the new baseline.

Shoppers and readers now expect every visit to feel made for them. When the experience adapts, they buy more, stay longer, and come back — and the gap between personalized and generic keeps widening.

①

Right product

Recommendations tuned to live intent lift average order value.

②

Right message

Targeted offers convert better than a one-size-fits-all banner.

③

Right moment

Behavior-triggered email and on-site nudges re-engage at the peak of intent.

Personyze turns that expectation into measurable revenue.

MEET PERSONYZE

The no-code personalization & A/B testing platform built for marketers.

Personyze unifies website personalization, recommendations, AI-managed promotions, A/B testing, reviews and surveys, an AI chat agent, hosted landing pages and email in one platform — powerful enough for enterprise teams, simple enough to launch in hours without engineering.

Since 2008

evolving the platform for 18 years

1,500+ teams

from mid-market to global enterprise

No-code

marketers ship without dev tickets

One platform

web, email, chat & recs on one profile

ONE ENGINE, EVERY TOUCHPOINT

Website

AI chat agent

Hosted landing pages

Mobile apps & push

Email & SMS

ONE PLATFORM

The full personalization toolkit.

Recommendations, promotions, testing, targeting, reviews, chat, landing pages and email — one engine, one visitor profile.

Recommendation Engine

300+ AI algorithms for products & content

AI Promotion Manager

Add-on • the offer each visitor is likeliest to take

AI Chat Agent

Add-on • answers from your site and knows who's asking

Dynamic Landing Pages

One URL, tailored to every visitor

Hosted Landing Pages

Add-on • whole pages we serve, on your domain or ours

A/B Testing

Winners by audience; Auto-pick deploys them

Pop-Ups & Banners

Targeted: you choose who, where & when

Reviews & Surveys

Add-on • reviews, NPS & surveys that personalize

Behavioral Targeting

70+ rules on any signal

Audience Discovery

Add-on • high-converting audiences found in your data

Social Proof

Trust signals that convert

ABM Marketing

Recognize the company first

AI Copilot

Builds audiences & campaigns from a prompt

Email Personalization

Triggered drips with live content

Open-Time Email

Recs rendered when they open

DISCOVER & CONVERT

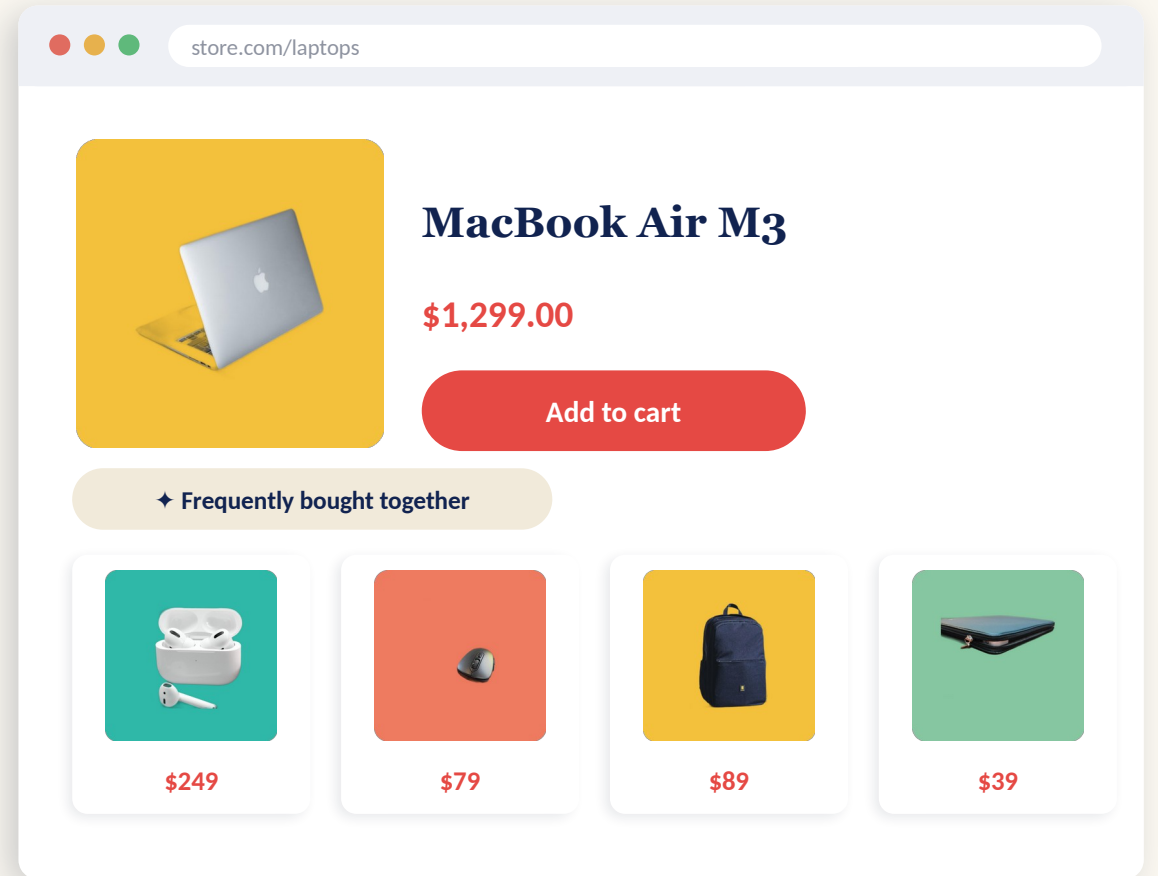

Lift AOV with AI product recommendations.

Show every visitor the products they're most likely to buy next — bigger carts and more repeat orders, powered by 300+ tunable algorithms that learn from real behavior.

- Cross-sell, upsell, similar & recently viewed
- Live on PDPs, cart, checkout, home & email
- Real-time scoring as visitor intent shifts

+18%

average AOV lift on product pages

ENGAGE & RETAIN

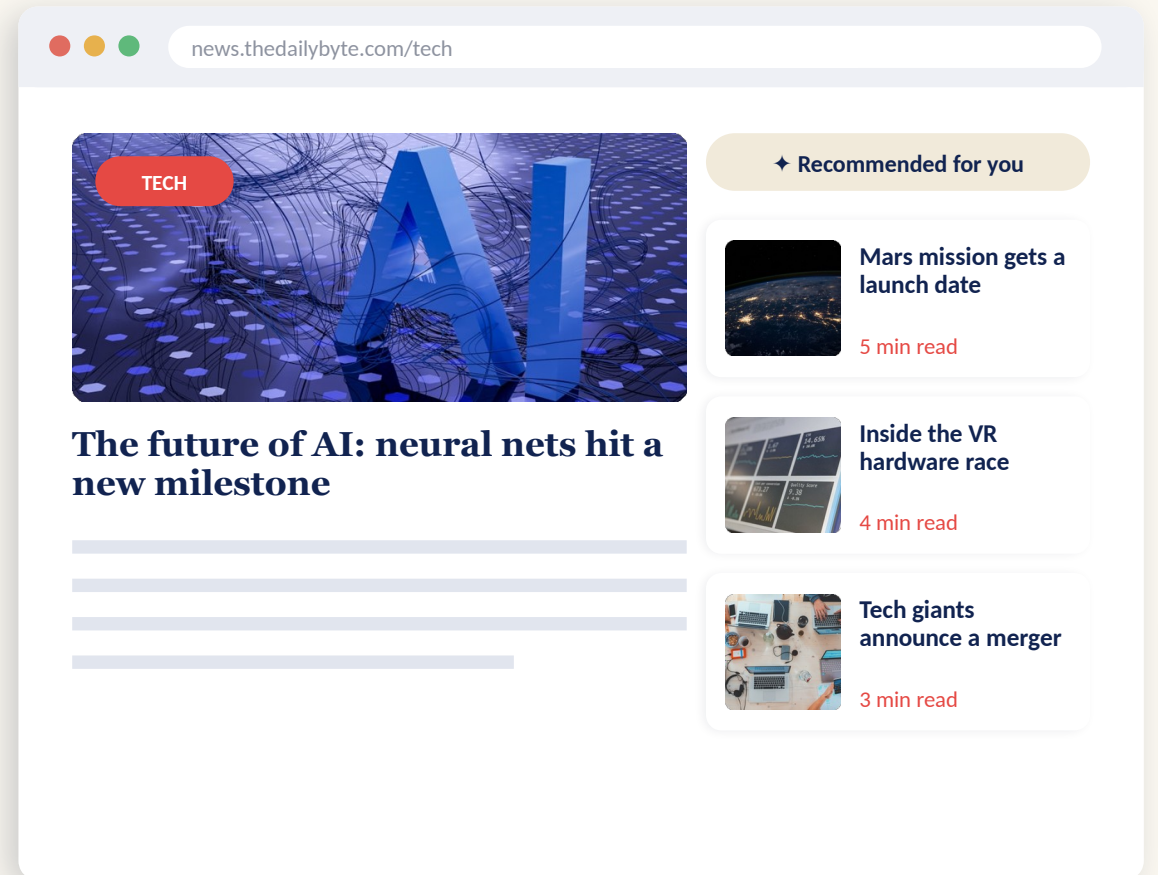

Keep readers on-site with relevant content.

Surface the next article, video, or resource each visitor is most likely to engage with — matched to interests, reading history, and on-page behavior, and refreshed in real time as they browse.

- Article, video & resource matching
- Behavioral, interest & reading-history signals
- Inline widgets, carousels & overlays — 20+ display types

1.6×

more pages per session

HIGHER AD ROI

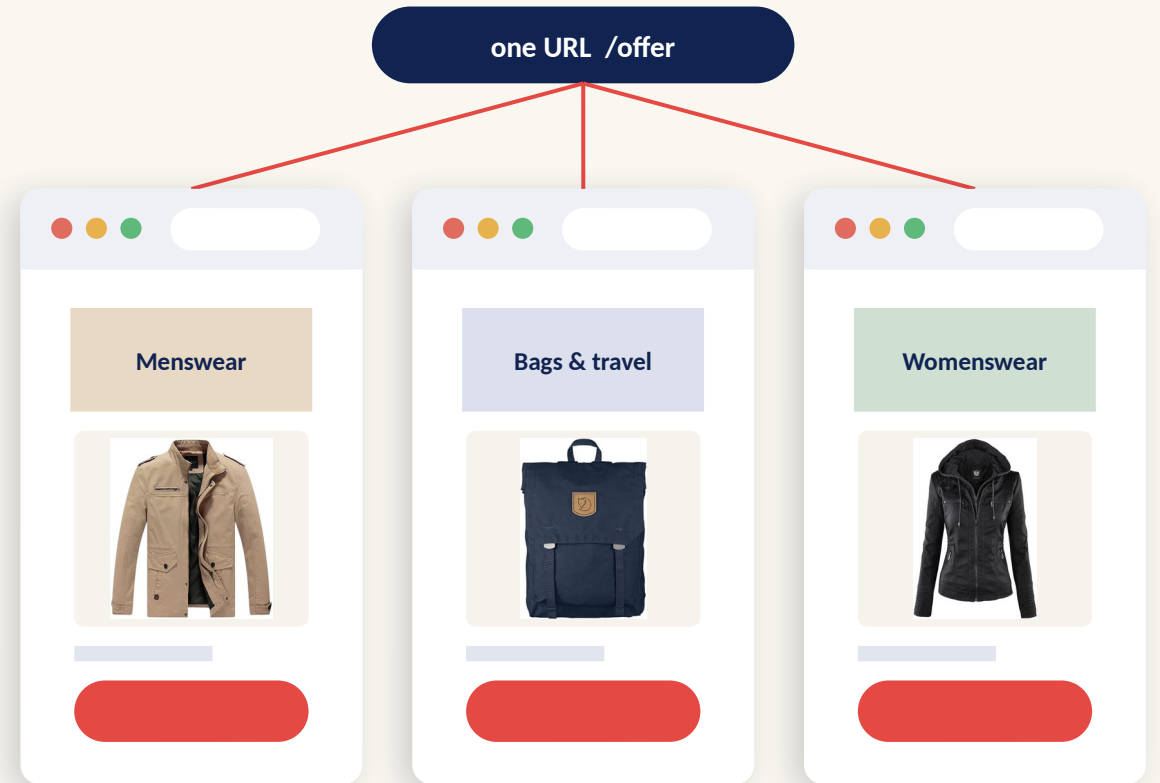

One landing page, tailored to every visitor.

Match every ad, campaign, and audience without building duplicate pages. Swap headlines, images, CTAs, and offers in real time based on source, industry, or behavior.

- Source, industry & account-based variants
- Swap headline, image & CTA in real time
- No duplicate page builds — one URL serves all

+22%

conversion vs. building duplicate pages

HOSTED LANDING PAGES

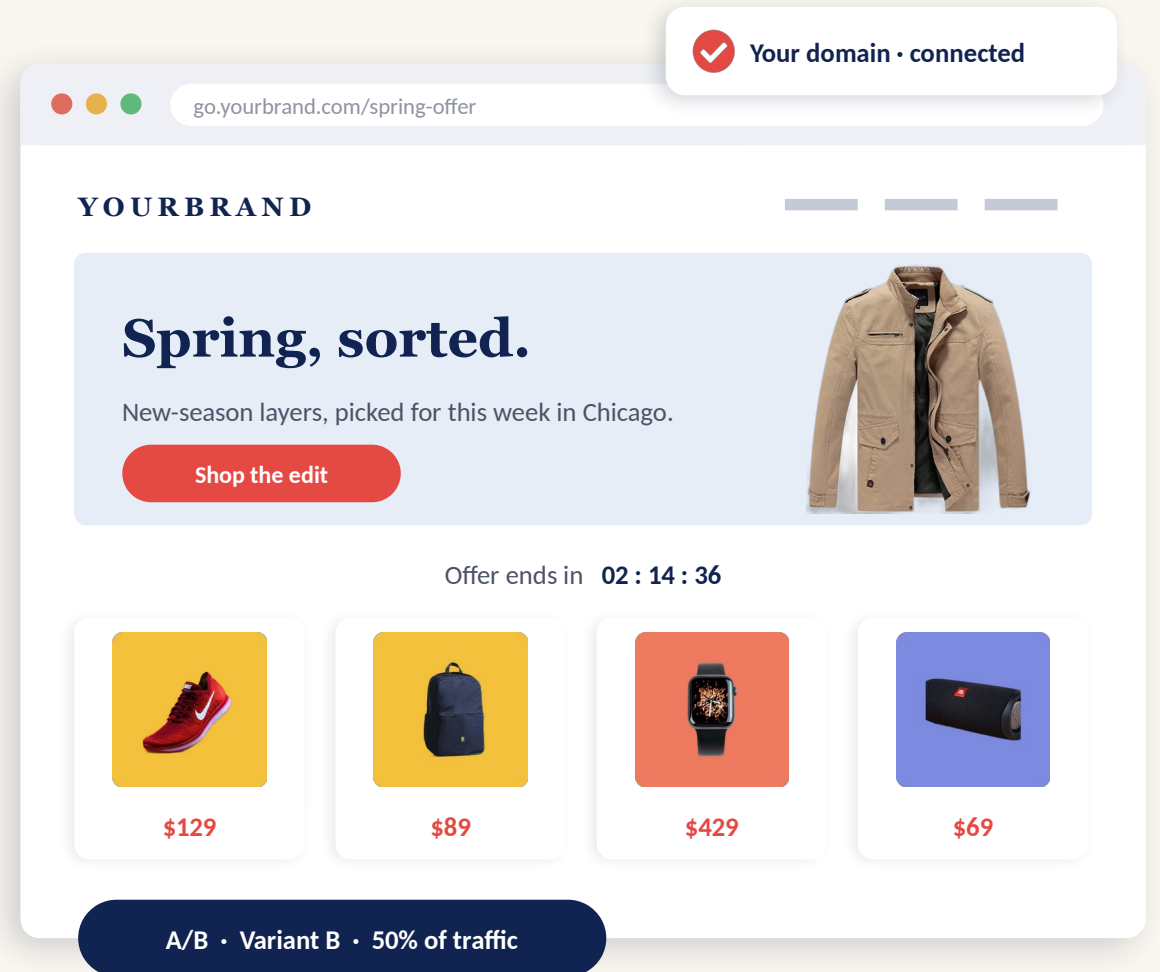

Launch a landing page without a web team.

Build a whole page in the same editor as your campaigns and Personyze serves it — on your own domain or a Personyze URL. Nothing to deploy, nobody to ask.

- Your own domain, or a Personyze URL
- Personalized on the server by geo, source & time of day
- Same blocks, targeting & reporting as every campaign

1 URL

two pages behind it — add a second page and it becomes an A/B test

CAPTURE & PERSUADE

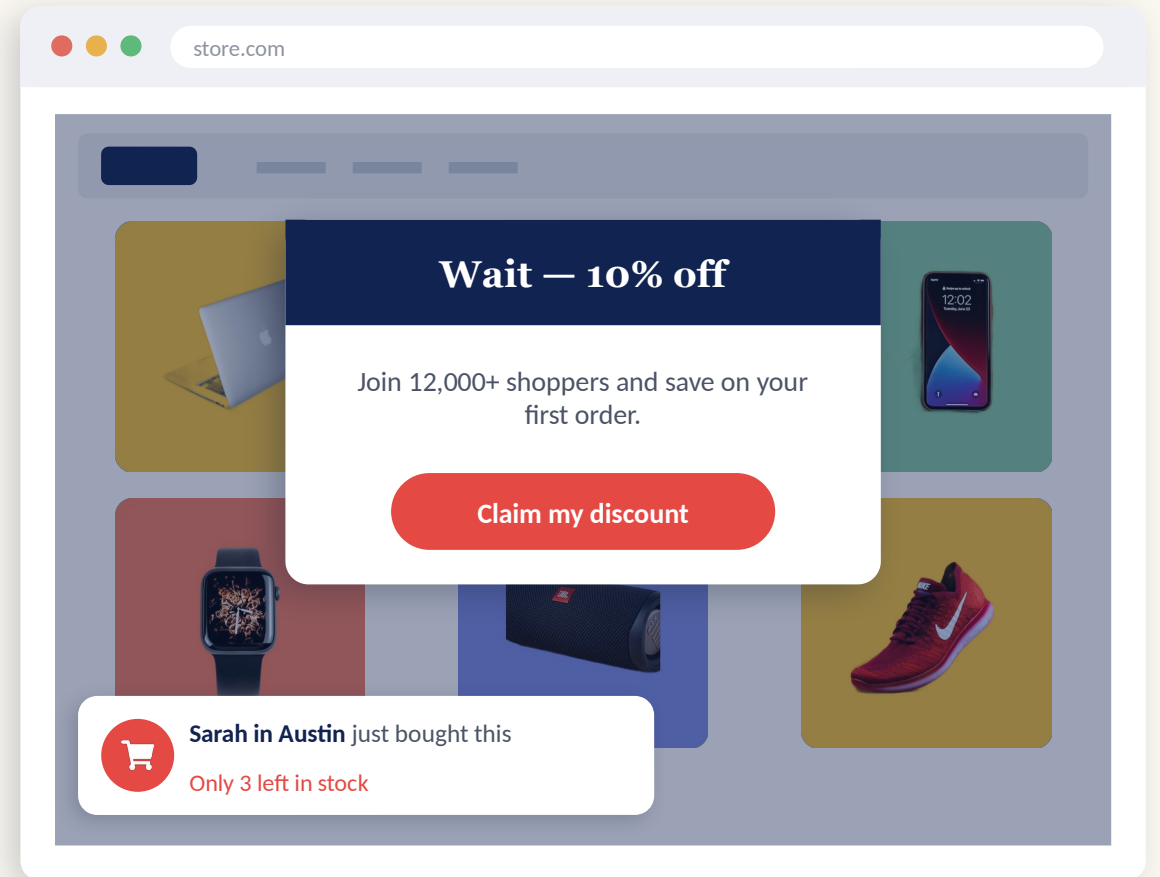

Banners, pop-ups & social proof that convert.

Trigger overlays by behavior, intent, geo, or referrer — then back them with live stock counts, recent purchases, and urgency pulled automatically from your store.

- 100+ pre-built, responsive campaign templates
- Exit-intent, scroll, dwell & cart-value triggers
- Live, auto-updating social proof — never stale

+28%

capture-rate on exit-intent offers

The right promotion for every visitor.

List banners, text promotions and coupons once. For each visitor, Personyze picks the one most likely to convert — learned from what visitors like them bought — and keeps learning.

- One list: dates, pages, audience, language & code
- Personal coupon codes from a pool — no leaks
- Lift over a held-out group, audience by audience

9

ways to choose each visitor's promotion
— Optimize learns live

The screenshot shows a web browser window with the address bar displaying 'store.com/outerwear'. The main content area features a promotional banner for 'PARKA WEEK' with the text '20% off the Alpine and the Sherpa' and a 'Shop parkas' button. To the right of the text is an image of a tan parka. Below the banner is a dark blue section titled 'PERSONYZE AI · PROMOTIONS THAT FIT HER' with a 'bought' label on the right. This section contains a table of three promotions with progress bars and conversion percentages.

PERSONYZE AI · PROMOTIONS THAT FIT HER		bought
Parka week - 20% off		6.8%
15% off parkas, with a code		4.1%
Free returns for 60 days		2.3%

✓ Shows the one most likely to convert

HEAR FROM THEM

Reviews, feedback & surveys that personalize.

Show each visitor the reviews and customer logos that match them, ask for an NPS score or a short survey at the right moment, and keep every answer on their profile.

- Reviews & testimonials matched to each visitor
- NPS, feedback & surveys with logic, in any language
- Answers become targeting rules — and reach your CRM

4

AI CHAT AGENT

A chat agent that knows who's asking.

Answers from your own pages, files and catalogue — and already knows the visitor it's talking to. The chat is a campaign action, so targeting decides who gets which assistant.

- Answers with products, ranked for this visitor
- AI Product & Content Finder: a shortlist, each pick explained
- Hands the thread to a person, and books meetings

Zero

extra code — it runs as a campaign on the Personyze tag you already have

The screenshot shows a web browser window with the URL `store.com/winter-coats`. The main content area displays a tan parka with the title "Alpine Parka" and a price of "\$248". Below the product is an "Add to cart" button. To the right, a chat widget is active. The chat header says "Ask us anything" with a subtext "AI assistant · hands over to our team". A red bubble contains the question "Will the Alpine keep me warm this week?". A light blue bubble responds: "It's going below freezing in New York this week — the Alpine is made for it. Full-price winter coats are 20% off until Sunday." Below this, a dark blue button shows the code "WINTER20". Further down, a product card for the "Alpine Parka" is shown with the price "\$248 · in stock" and a "View" button. At the bottom of the chat is an input field "Ask a question..." and a red send button. A separate box titled "ALREADY KNOWS" lists visitor data: "New York · -3°C this week", "3rd visit · came from email", and "Viewed parkas & boots".

AUDIENCE-FIRST TESTING

Run smarter A/B tests on any audience.

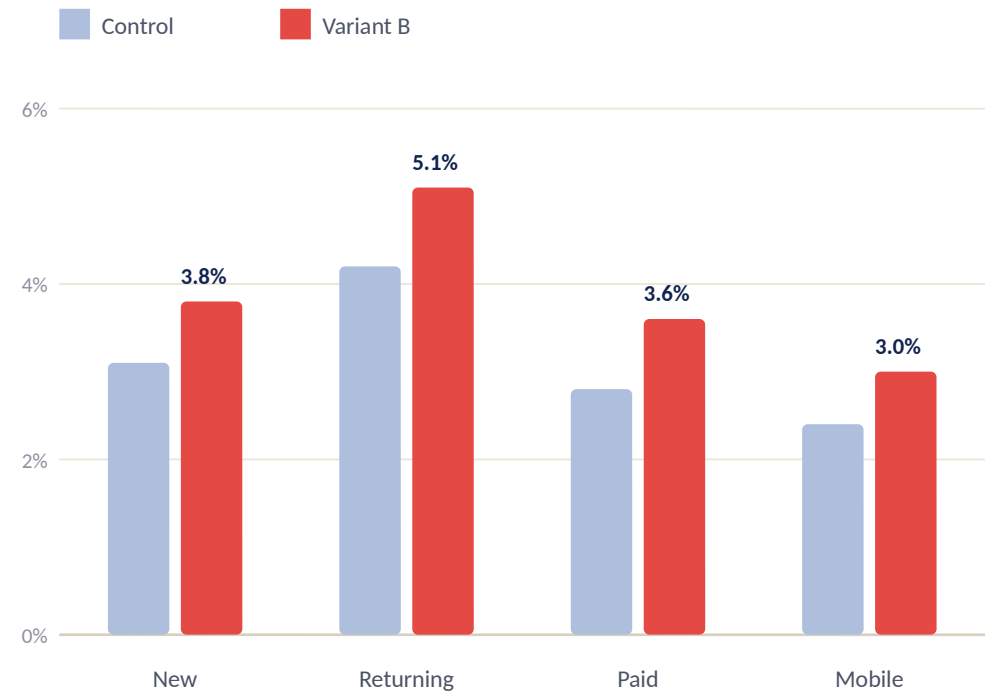

Test headlines, layouts, CTAs, and full journeys — then slice results by segment, source, or behavior to see what actually moves each audience, not just the average.

- Built-in significance & sample sizing
- Holdout groups for true incremental lift
- A winner for each audience, applied in a click

+22%

average lift across active experiments

Conversion lift by audience segment

MEASURE & OPTIMIZE

Track performance. Prove the lift.

Every campaign doubles as an experiment — a built-in A/B engine splits traffic against a control group and reports clicks, conversions, and revenue per variant in real time.

- Live dashboards per campaign, variant & segment
- Conversion goals, funnels & revenue attribution
- Auto-pick declares and deploys the winner for you

24/7

live reporting on every campaign and variant

KNOW EVERY VISITOR

A living 360° profile of every visitor.

Every experience starts with data. Personyze merges on-site behavior, context, and your own customer data — CRM, email, purchases — into one unified profile per visitor, anonymous or known.

- Behavioral, contextual & first-party data in one view
- Anonymous visitors profiled from their very first click
- Synced across sessions, devices & channels

360°

single view of each visitor, powering every campaign

TARGETING ENGINE

Right message. Right visitor. Right moment.

70+ targeting rules combine any signal you have — and for B2B, Personyze detects target accounts by reverse-IP or CRM match to serve one-to-one experiences at scale.

Account-Based Marketing

- Reverse-IP detection + CRM match
- Native Salesforce, HubSpot, 6sense & Segment
- Company data from Leadinfo, Leadfeeder, Albacross & ZoomInfo
- Industry-specific messaging, logos & offers
- Account-specific landing pages at scale

BUILT FOR ANY STACK

Personalize anywhere — your way.

Personyze runs on top of your existing site and stack — no replatforming. Reach every channel through one engine, and lean on our team as much (or as little) as you need.

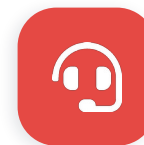

Works on any platform

One JavaScript snippet runs on any CMS, framework, or headless stack — Shopify, WordPress, Magento, React, Vue, or custom. No replatforming, no database changes.

API & mobile SDKs

Server- and client-side REST & GraphQL APIs, plus native iOS & Android libraries — personalize web, mobile apps, email, and ads from one engine.

Managed service, if you want it

Optional white-glove implementation: our experts build, QA, and launch your campaigns — with managed-service hours included on every paid plan.

PERSONALIZATION, INCLUDED

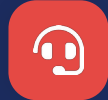

More than software. People, process, integrations.

A real personalization platform isn't just code. Every plan includes our in-house experts and an AI assistant that builds whole campaigns for you — onboarding, strategy, and campaign builds on a flexible pay-as-you-go model.

AI Assistant

Describe the goal; it builds the whole campaign — audience, design, placement — for you to approve, then reports.

White-Glove Service

Onboarding, training & campaign setup with a dedicated success manager.

AI Chat Agent

Answers visitors from your own pages and catalogue, and hands over to a person when it should.

Wizards & Templates

Step-by-step guidance and stunning, responsive templates — no design needed.

Performance Analytics

A dashboard of default metrics plus your own custom KPI tracking.

CRM & User Data

360° user profiles with plug-and-play CRM, CDP & ABM integration.

API & Integrations

Server- and client-side APIs that work on any platform, any channel.

Quality Control

Safe preview environments, shareable links, SSO & granular permissions.

Personalization that shows up in the metrics.
